

Student Physical Examinations

Code # 453.05

The Tri-County Area School District recognizes its legal and ethical obligation in protecting the health and well-being of its students.

The laws of the State of Wisconsin require certain school employees to report incidents of child neglect and abuse and document failure by parent(s)/guardian(s) to properly immunize school-age children against communicable and/or infectious diseases. Therefore, the District may request physical examinations of a student in cases where suspicions or good cause exist that a serious health or safety condition may prevail. Such physical examinations shall occur at no cost to the District.
