

Instructional Technology

Code #363.00

All use of District technology must be in support of the mission and educational objectives of the Tri-County Area School District. Any violations may result in loss of District technology use privileges, school disciplinary action, legal action and/or compensation for damages to District property.

The District is obligated to protect its investment in technology resources. In order to accomplish this goal, everyone using District technology shall follow established procedures to protect computer systems from viruses, unintentional and intentional harm. Deliberately damaging computer systems is an illegal act, according to state and federal laws, and will be dealt with accordingly.

All files are considered property of the District and may be subject to review by the Network Administrator/Building Principals/District Administrator.
