

School Census Report

Code #412.00

The Tri-County Area School District is interested in providing educational programming to all children who reside within its boundaries. This requires early identification of families with children regardless of the ages of the children, so that information about educational services and programming can be provided to families with infants, pre-school and school-age children in the District.

The District shall establish a means to gather current census data from within the District's boundaries that accurately provides information of families with children from birth through age twenty as of June 30th each year.

Census data of children ranging from birth through twenty shall be entered into the school records each year for the purpose of meeting statutory requirements for the Department of Public Instruction and for the District to notify parents of special programming and services for children ranging from birth through twenty.
